

## THE WORLD OVER

### YOUNGER GENERATION DEMAND DISARMAMENT

#### MANCHURIAN TROUBLE

Whatever may be said against the younger generation, one thing in their favor is the fact that they are heartily in favor of disarmament. For the past few months there has been a strong advance by the younger generation in Europe and America for the disarmament cause and recently a group of young men representing these countries, confronted Mr. Arthur Henderson at Geneva with demands for drastic disarmament. This may mean little to the casual reader of the article, but when one delves deep into the question they see the world of the next generation in a far different light. In years hence we will see every country following out the plan of disarmament to the last letter and without the means to wage war, every little skiff that the nations may have among themselves will be settled long before they can get an army together and make preparation for war. "The pen is mightier than the sword." "Prevention is better than cure." These maxims are wholly true. Let us carry them with us throughout the years we have before us and with the younger generation already on the right path to world peace, we should all feel more secure for ourselves and our children, who will carry on the bonds of freedom.

Manchuria seems doomed to warfare. Since the conflict between the Japanese and the Chinese has been subdued to a certain extent in China proper, the trouble has changed to Manchuria, where the Japanese and Chinese will not unite under the rule of Henri Pu Yi. All over Kirin Province revolters are fighting Japanese troops within 100 miles of Vladivostok, where Moscow is said to have 30,000 troops. Tokio is rushing troops to Manchuria to reinforce the Japanese army and we may yet see a conflict with some violence, as this fighting is out of the International Settlement zone and other nations will not step in to restore peace. Russia sits back, but not without preparation for warfare. The Soviets may still get their chance to step in and attempt to regain Manchuria. It is almost certain that Russia will enter the conflict with the least opportunity.

After a ten-year closure, Imperial Oil Company's wells at Fort Norman flowed crude oil when tested recently by Ronald W. MacKinnon, expert, who arrived in Calgary recently from a trip to the Canadian arctic. The wells are a source of fuel supply for the aeroplane activity in the north country in connection with the Great Bear lake radium-silver rush.

## ANNUAL MEETING OF THE CARBON GOLF CLUB

Meeting notices are out announcing the annual meeting of the Carbon Golf Club, which will be held in the Municipal office on Thursday (tonight) at 8 p.m. All members and others interested in golf during 1932 are asked to be present at this annual meeting. The golf course is in good shape and many players have been enjoying the game the past week.

## FARMERS CAN SECURE SEED

The Department of Agriculture has just issued a circular letter to the secretaries of municipal districts announcing that seed oats will be available again this year. These oats will be handled through the Pool elevators and will cost approximately 40 cents per bushel. Before securing these oats the farmer must give a statement of his previous year's indebtedness for seed grain and must have the written consent of the registered owner of the land before delivery will be made.

### LIBERALS TO CONVENE

Liberals from all sections of the province will gather in Edmonton in convention on June 16-17-18 to select a new party leader in succession of J. W. McDonald, K.C., of Macleod, who recently resigned.

In addition to choosing a leader, the convention will formulate a new provincial policy and complete a new provincial organization.

It is expected that the Rt. Hon. W.L. Mackenzie King, Dominion Liberal leader, will be present, as well as Hon. T.D. Pattullo, British Columbia leader; Hon. J.G. Gardner, Saskatchewan Liberal leader; and Mr. McKay, Manitoba Liberal leader.

### SETTLERS MUST PAY THIRD OF TRANSPORTATION COSTS

According to a new ruling which went into effect last week, settlers desiring to move from the drouth areas to other sections of the province will be required to pay one-third of the passenger and freight costs. The arrangement in effect last year and up until March of 1932 would not be continued by the Dominion Government. That is, the one-third which was paid heretofore by the Dominion, must now be paid by the settlers. The Canadian National, the Canadian Pacific and the Provincial Government have agreed to each absorb one-third of the costs of transportation.

## ALBERTA NEWS

With their work on the western air mail service ended, two Boeing bi-planes were flown over the Rockies to Vancouver from Lethbridge last week by two Canadian Airways pilots.

Sounding a warning that court charges would be laid against radio owners who failed to secure licenses, Alfred Duranleau, Minister of Marine, told the House of Commons that a drive had started against non-permit holders.

Holding that Alberta game laws preserving certain species of game applied to Indians as well as whites, Magistrate G. E. Sanders fined William Wesley \$10 and costs for shooting a deer with horns less than four inches in length.

The petition of the Alberta Prohibition Association to abolish beer parlors, which has been presented to the provincial government to deal with, has been set aside for another year. One of the reasons given is, that owing to the financial stringency at the present it would not be a suitable time to hold a plebiscite on the question.

According to the Three Hills Capital a contract has been let for the graveling on the new highway from Delburne to Stettler. Between Elnora and Delburne grading is to be continued as a relief measure.

The National Elevator at Pultholm, four miles north of Claresholm, was completely destroyed by fire recently, with fire damage done to the 38,000 bushels of wheat which were stored.

Several farmers north of Macleod started work on their land some two weeks ago and it is expected that seeding will commence about April 15 if present weather conditions continue.

The Canadian Airways, Limited, will open an air service between Calgary and Edmonton on May 1.

### TESTS TO FIND IF FIELDS FREE FROM CUTWORMS

Tests to discover whether or not a field is free of cutworms, which are expected to menace western crops this year are being outlined to farmers by federal government experts.

Entomologists suggest that when the farmers are doubtful of a field being free of cutworms, test should be made by seeding an indicator strip of wheat diagonally across the field. This indicator strip should be seeded as early as it is possible to get a drill on the land and long before regular seeding starts. This strip will give a fair example of the conditions which will bring this grain to a height of about five inches, will also hatch many of the eggs. If on examination from 10 to 15 plants per square yard show injury the field should not be seeded. Under normal conditions the strip will show by the end of the first week in May or earlier whether or not cutworms are present. No fields should be seeded to any crop, especially flax, where cutworm damage is evident so long as there are cutworms present and active.

### ADVERTISING IS CHIEF SOURCE OF REVENUE

Publicity is a newspaper's stock in trade, and it is to the individual's and the community's interest just as much as to the interest of the newspaper itself to see that a newspaper is adequately recompensed for publicity matters, because if a newspaper is properly supported, it is able to render broader and more effective service to the community.

Free publicity should be no more expected from a newspaper than free advice from a lawyer, or free medical advice from a physician. Most publishers are always willing to go more than half way in giving publicity to deserving causes; but it takes money to conduct a newspaper and its advertising and its advertising space is its chief source of revenue.

## Dominion Gov't Increases Taxes

TARIFF CHANGES CONFINED TO EXTENSION OF SPECIAL RATE ON IMPLEMENT REPAIRS DUE TO APPROACHING IMPERIAL CONFERENCE; SPECIAL SESSION OF PARLIAMENT POSSIBLE AFTER OTTAWA MEETING; EXPENDITURES REDUCED; NEW TAXES.

OTTAWA, April 9.—With axe and tax, the Dominion is determined to crease in the debt last year of some balance its budget. Faced with an increase in the debt last year of some \$119,000,000, E.N. Rhodes, Minister of Finance, announced in his budget speech a double-edged policy of drastic increases in taxation and unprecedented slashing of expenses.

Possibly indicating a special session of Parliament later in the year, after the Imperial Economic Conference in July, only one tariff change was announced by the Finance Minister. Arrangements under which repair parts for foreign-made farm implements were imported at reduced tariff rates, were extended until March 31, 1933.

New taxes, designed to increase the revenue by \$55,000,000, were announced as follows:

Corporation tax increased from 10 to 11 per cent.

Income tax exemptions lowered and the entire schedule of taxation increased.

Sales Tax increased from 4 to 6 per cent, with a list of exemptions narrowed.

Excise tax on all imports increased from 1 to 3 per cent.

Stamp tax on cheques, money orders and promissory notes over \$5, increased from one to three cents and on all amounts over \$100, from two to six cents.

Tax on railway sleeping car berths, 10 per cent with 25 cent minimum.

## CARBON M. D. SET MILL RATE

The regular monthly meeting of the Council of the Municipal District of Carbon No. 278 was held in the Municipal office, Carbon, on Tuesday, April 5th.

The principal business of the meeting consisted of the regular routine of accounts and the discussion of seed grain problems.

Mr. R. Garret was appointed Pound-keeper in Division 3 in lieu of Mr. G. C. McCracken.

The council decided that the scale of wages for municipal work this year would remain as in other years and the working hours should consist of 8 hours actual work. It was also decided that the Secretary-Treasurer shall not issue any cheques for payment of road work in cash. All payments will be applied on account of Municipal taxes.

The Budget of Expenditures and Revenue was reviewed by the Council and the rate of taxes for the current year was set at 5 mills.

The Council at this meeting passed a By-law authorizing the payment of a grant to the Salvation Army for relief and hospital work.

Chair car tickets taxed 10 cents.

Five cent tax imposed on telegrams, cables, radio messages and long distance telephone calls costing over 15c.

What am de matter with yo' niggah? Ah jes feels so tired dat ma' legs acts like day am no relation to ach other.

### Reducing Costs Of Government

The proposal for the amalgamation of the three prairie provinces of Canada into one large provincial unit recently advanced by Premier Bracken of Manitoba, and supported by Hon. Mr. Justice Turgeon of Saskatchewan, does not, it would appear, command very general or enthusiastic support on the part of the people in the area affected. It has only aroused a certain academic interest in much the same way as similar proposals in regard to three much smaller Maritime Provinces have been received at varying periods since Confederation.

This lack of interest in, and support for, the idea of one big province does not, however, presuppose a complete satisfaction on the part of the people with the present unduly heavy costs of governmental administration in this country. That there is a keen and very much alive interest in this larger problem is made manifest in many ways.

There are, for example, the proposals before Legislatures in certain of the Prairie and Maritime Provinces for a reduction in the membership of those bodies. In Saskatchewan, at the time of writing this article, a bill is under consideration reducing the number of members in the Legislature from 63 to 52. The effect of such reduction, if it is made effective, will be a saving of from \$20,000 to \$25,000 a year. Such a saving is, of course, worth while,—as all savings are heavy costs of governmental administration in this country. That there is a keen and very much alive interest in this larger problem is made manifest in many ways.

The writer is convinced that it is not in the union of two or three provinces into one, nor in the mere reduction in numbers of the membership of legislatures, that substantial and therefore really worthwhile savings can be brought about. It is not a few thousands of dollars in the costs of government in Canada that should be saved, but millions. Can economies be effected that will save these millions to the taxpayers without impairing services to the people or efficiency in their administration? We believe they can.

But mere criticism of existing conditions, even when coupled with expressions of beliefs that they can be bettered, is not convincing unless accompanied by practical suggestions looking to reforms and a betterment of conditions. Anybody can criticize; destructive criticism is easy, but constructive suggestion and performance is an entirely different and a much more difficult matter, especially as all such action has to meet and overcome long-established and presently existing conditions.

Not in revolution, therefore, but in evolution, and particularly at this time in co-ordination of services, in co-operation between governments looking to an amalgamation of services rather than in an amalgamation of governments and provinces, is to be found a practical, ready-to-hand method of saving ten thousands but hundreds of thousands of dollars.

To illustrate: Canada with a Federal and nine Provincial Governments has ten departments or bureaus dealing with agriculture; ten dealing with public health; ten dealing with company incorporation, company law, company inspection, company taxation, including banks, railways, loan, mortgage and insurance companies; ten having to do with administration of justice; ten levying, or having the power to levy, income taxes, etc., etc. The result is, of course, constant conflict of authority, duplication of services, much unnecessary expense, and interference with and the irritation of the people generally.

Everybody realizes the situation, but governments, like individuals, are loth to relinquish any powers or rights they possess, they are jealous of these things and zealous in retaining every atom of control over them. Even within a government, it is difficult to re-organize departments to meet changing conditions because one department opposes the transfer of any branch of its work to another department, and the more highly organized and independent a Civil Service becomes, the more bureaucratic does it become.

To illustrate again: The enforcement of law and administration of justice within a Province is the duty of the Provincial authority. Hence it must have a police force. But the Federal authority is responsible for the enforcement of its own Customs, Excise, Immigration, Postal, and similar laws, and is responsible for the administration of Indian affairs. So it, too, must have a police force. Then the cities and larger towns are responsible for the enforcement of their own by-laws. So they, too, have police forces.

Four or five years ago the Government of Saskatchewan entered into an arrangement with the Federal Government whereby they disbanded the Saskatchewan Provincial Police, and the Royal Canadian Mounted Police, a Federal body, policed the Province in addition to discharging its own Federal duties. The Province pays the Dominion a lump sum annually for this work, but it is saving some hundreds of thousands of dollars annually as compared with the cost of maintaining a separate police force of its own. Recently Alberta and Manitoba have made similar arrangements with the Federal Government. Thus without any union of governments or legislative bodies, without surrender of any Provincial right or authority, without any curtailment in service or any impairment in efficiency, millions of dollars will to the Dominion.

### Her Heart Was So Bad Couldn't Do Housework

Mrs. S. Dragoman, R.R. 2, Midland, Ont., writes:—"I had been troubled with heart trouble for many years.

My heart would beat so fast I could hardly breathe, and I had headaches, and dizzy and fainting spells.

I couldn't get my housework done I was so weak. I took three boxes of Milburn's Heart and Nerve Pills and felt much better, and now I would not be without them in the house."

Price 50c a box

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

### "Death-Ray" Experiments

Tests Being Made So Far Have Been Quite Harmless

Favorite among the projects of inventors of war devices is a "death-ray" that will kill enemies at a distance. The few who have claimed any progress toward such a ray have tested it harmlessly by stopping automobile motors or by setting off explosive charges at a safe distance. The latest of these is Kurt Schimkus, a chemist of Berlin. He succeeded recently in exploding a mine two hundred yards away.

### WHEN GASTRIC JUICES FAIL TO FLOW

You know how badly an engine runs when it gets clogged up. It's the same with your body when your gastric—or digestive—juices fail to flow. Your food, instead of being assimilated by your system, simply collects and stagnates inside you, producing harmful acid poisons. What you need then is a tonic—Nature's own tonic—Nature's six mineral salts.

You get all these six salts in Kruschen Salts, and each one of them has an action of its own. Together, they stimulate and tune up the bodily functions from a number of different angles. The first effect of these salts is to promote the flow of the saliva and so awaken the appetite. The next action occurs in the stomach, where the digestive juices are encouraged to pour out and act upon the food. Again in the intestinal tract certain of these salts promote a further flow of these vital juices which deal with partly digested food and prepare it finally for absorption into the system.

So you see there is no mystery about Kruschen. It works on purely scientific and well-known principles. Prove it for yourself.

### New Pyramid Found

Built About 2800 B.C. Only the Base Remains

Egypt rocks with excitement over a fresh find. A pyramid, built about 2800 B.C., is discovered in the Gizeh sands. Its base, of 5,000 square yards makes it rank along with the big three. It may contain the sarcophagus of Miss Cheops. Only the base remains, the rest having been carried away—perhaps to be used in other pyramids. Ancient builders were that odd. The Egyptians destroyed to build anew. Their unwitting contemporaries the Mayas of Yucatan built one magnificent temple squarely upon another.

Reduced By Asthma. The constant strain of asthma brings the patient to a dreadful state of hopeless exhaustion. Early use should by all means be made of the famous Dr. J. D. Kellogg's Asthma Remedy, which more than any other acts quickly and surely on the air passages and brings blessed help and comfort. No home where asthma is present in the least degree should be without this great remedy.

### Historic Sword Sold

Was Presented To Sir John French After Boer War

A field marshal's sword, sheathed in solid gold and with a gold diamond-studded hilt, has been sold to the London Bullion Company by persons taking advantage of the present monetary situation to profit by gold disposal. It was understood that the sword was the one presented to the late Earl of Ypres, then Sir John French, after the Boer War. The blade was presented by the citizens of Kimberley in 1901 in gratitude for the action of the earl, who led a series of cavalry charges to lift the siege of the city. The new owners said they had no intention of melting the sword, but probably would offer it to the citizens of Kimberley.

Douglas Egyptian Liniment is recommended for sore necks, galls, distemper, callouses and spavins. Removes proud flesh and Hoof Rot. Stops bleeding instantly.

### Utilizing Cherry Stones

Usefulness Of Every Part Was Discovered By Accident

After accidentally stepping on a cherry stone and observing the greasy spot left on the floor, an orchardist and canner now uses the pits as well as the fruit. The oil in the kernels is pressed out and used in the making of cosmetics, the left-over cake in the press is sold for fertilizer, and the shells are utilized for fuel.

### Canada's Economic

#### Outlook Brighter

Improvements In Wheat, Cattle, Lumber and Nickel Exports

Bright prospects with the advent of Spring, in Canada's economic situation are noted in a statistical review issued recently by the Department of Trade and Commerce. The review covered statistical reports issued by the Dominion Bureau of Statistics and the "bright spots" include:

A hopeful export outlook for Canadian wheat shown by world statistics. Early Spring shipments of Canadian cattle to Great Britain have been well received.

Canadian cattle markets are showing increased strength.

Exports of Canadian lumber show a substantial seasonal increase.

Shipments of nickel, particularly to the United Kingdom, are on the increase.

Domestic production of gold, petroleum natural gas show a decided improvement.

### Seems Hardly Cricket

United States Encourages Indians To Speak Against Great Britain

We note another native Indian has been telling the good folk of Philadelphia what a wicked administration is given India by the British. He was debating with an Englishman who upheld the British rule. It seems to be one of the hobbies in the United States at the moment to flood the country with native Indians to speak against Great Britain. It may amuse the Americans, but it hardly seems to be cricket for them to encourage that sort of thing.—Border Cities Star.

### Your Home Medicine Chest.

Among the standard household remedies that should always be on hand in your home medicine chest, none is more important than Dr. Thomas' Electric Oil. Its manifold usefulness in relieving pain and healing sickness is known by many thousands throughout the land. Always use Dr. Thomas' Electric Oil for relieving rheumatic and sciatic pains, treating sore throats and chests, coughs, burns, scalds, cuts, bruises and sprains.

### First Lipton Shop Closed

After 60 years of activity the first shop to be opened in Glasgow, Scotland, by Sir Thomas Lipton, has been closed. The shop was started by Lipton with a slender capital on his 21st birthday after his visit to America. Lipton ran it personally, sleeping under the counter at night. The business was transferred to other Lipton branches.

Dwarfs were objects of great interest to the ancient Romans, and artificial dwarfing was sometimes practiced.

### Proposed Water Reservoir

Suggested Plan To Conserve Moisture In Southern Saskatchewan

Formation of a large water reservoir at Buffalo Lake by the construction of a dam on the Qu'Appelle River, 20 miles from Moose Jaw, was advocated by T. C. Main, A.M.E.I.C., consulting engineer for the Saskatchewan drouth commission in an address given at Moose Jaw.

Mr. Main's proposal will be placed before the provincial government as a recommendation in his report. The reservoir would be about 25 miles in length and three-quarters of a mile wide. The reservoir would be an effective means of conserving water for southern Saskatchewan, Mr. Main said.

He also suggested, that despite present opposition, the Saskatchewan River water diversion scheme would go through within the next few years.

Mr. Main pointed out that the precipitation in northern Saskatchewan last year was not a great deal more than in the south and while the rainfall in the north had been conserved, it had drained off rapidly in the southern parts.

Persian Balm invests every woman with subtle charm. Delicately fragrant. Cooling and healing. Disperses all roughness or chafing. Makes skin delightfully soft-textured. Every woman should use this peerless toilet requisite. Daintiness—beauty—refinement—Persian Balm achieves these in every instance. Softens and whitens the hands. Promotes clear and youthful loveliness. All women who care for additional charm unhesitatingly choose Persian Balm.

Son—"Dad, what's a matrimonial bureau?"

Dad—"It's a bureau, son, with six drawers packed full of women's fixings and one man's necktie."

**"FATIGUE?"**

*I just postpone it!"*

"No, I don't have 'nerves.' You can't have them, and hold this sort of position. My head used to throb around three o'clock, and certain days, of course, were worse than others.

"Then I learned to rely on Aspirin."

The sure cure for any headache is rest. But sometimes we must postpone it. That's when Aspirin saves the day. Two tablets, and the nagging pain is gone until you are home. And once you are comfortable the pain seldom returns!

Keep Aspirin handy. Don't put it away, or put off taking it. Fighting a headache to finish the day may be heroic, but it is also a little foolish. So is sacrificing a night's sleep because you've an annoying cold, or irritated throat, or grumbling tooth, neuralgia, neuritis. These tablets always relieve. They don't depress the heart, and may be taken freely. That is medical opinion. It is a fact established by the last twenty years of medical practise.

The only caution to be observed is when you are buying Aspirin. Don't take a substitute because it will not act the same. Aspirin is made in Canada.

# Back To The Land Movement Is Now Well Under Way Throughout Most Of Dominion

Census figures show that rural dwellers represent but 46 per cent. of Canada's population, that 54 per cent. live in villages, towns and cities. Census figures also show that Canada has 32,767 vacant or abandoned farms.

True, the census reveals that there are 728,244 occupied farms, representing a gain of 17,154, or a little more than two per cent. since 1921.

Nevertheless, and everything considered, the picture presented is not a satisfactory one, certainly gives no cause for complacency. Orators and publicists never tire of telling us that this is an agricultural country, that agriculture is our basic industry, that the strength of the nation must be in the soil. Yet while these things are true, or ought to be, we see an increasingly heavy proportion of our people drift to the cities. Forty years ago, in 1891, something like 32 per cent. of Canadians were in towns and cities, 65 per cent. on the land. With the turn of the century there began a trek to the cities, and notwithstanding the immigration of the early 1900's, plus the opening up of the West, the year 1911 saw the percentage of those on the land reduced to 54 per cent., while 1921 showed a practically even distribution as between urban and rural population. Now, ten years later, city dwellers are a majority. In five provinces—Ontario, Quebec, New Brunswick, Nova Scotia and Prince Edward Island—there has been a tremendous growth in vacant or abandoned farms. This at a time when we have acute unemployment, when millions are being spent for relief, when our large cities are over-crowded.

In these circumstances there must be encouragement in the knowledge that, prompted by good leadership, a back-to-the-land movement is presently under way throughout most of the Dominion. Wesley Gordon, who has pioneered the movement so far as the Federal Government is concerned, has achieved a striking success, and something of what he has done is revealed by Richard Churchill in the current issue of MacLean's Magazine. Thus:

"Mr. Gordon began his settlement scheme in the fall of 1930. Eighteen months have brought these results:

"Land to the value of \$11,500,000 has been sold. The average price paid was \$2,000. In all, 6,040 married men with families have been transferred from the ranks of the unemployed in the cities to the country; 12,682 single men who would soon have been in the bread line are now on the land. All told, nearly 43,000 people have been changed from needy urbanites to self-sustaining rural dwellers."

In addition, the province have their own back-to-the-land movements, and Quebec has taken 4,000 people from the cities, Ontario, 2,500, Saskatchewan over 1,000.

Let all of us hope that this movement grows; that it gains tremendously in momentum. Canada is one of the three greatest countries in the world in the matter of arable land; is able to offer a comfortable living to hundreds of thousands, to perhaps millions, willing to settle on farms. And a few extra hundred thousand Canadians on the soil would undoubtedly add to the strength and fibre of Canada as a nation.—Ottawa Journal.

"You here again? I told you I didn't want to see you again."  
"I told the policeman that, but he wouldn't believe me!"—Pele Mele, Paris.

W. N. U. 1937

## Beginning Of Architecture

Man Wanted To Protect Himself From Weather Say Historians

Historians of architecture tell us that man's first building efforts were for the purpose of protecting himself from the weather. He required shelter from the angry elements, and hence "the inclemency of the seasons was the mother of architecture." In his primitiveness he took the nests of birds and the lairs of beasts as his model, and the earliest hut was probably a mere arbour of twigs, afterwards covered with mud. Then huts were built of branches of trees and covered with turf. And there is every reason to suppose that the men who built shelters of this kind were agriculturists by occupation. The hunter on the other hand preferred a cave-dwelling, which protected him better from the attacks of his fellows or wild animals, while the shepherds who led a nomadic or wandering life, as some of them do today in Central Asia, naturally devised tents.

## Learned Boring From Worms

Method Studied By Makers Of London's First Underground Railways

Ship worms, which cause much damage to piers and ship timbers, taught the makers of London's first underground railways how to bore and line their tunnels to resist water. The worm makes a boring about half an inch in diameter, lining it with a limelike substance to keep out the water in the damp wood in which it lives. When engineers made the first attempts at underground passages they had difficulty in keeping the water out of the London clay. By studying the ship worm they learned that they could keep the bore dry by lining it as they progressed. In boring its passage the worm bites away the wood which passes in small particles through its body.

Mrs. Miggs: "Yes, most of the servants are as independent and as impertinent as they can be! Now, I believe it's best to take a young country girl and train her in the way she should go and then—"

Mrs. Biggs—"And then she goes!"

Wife (to husband driving his first car)—You really mustn't be so nervous, George. Remember, the other people on the road are just as frightened of you as you are of them.

## Census Figures For Farms

Show Increase In Number Occupied In Prairie Provinces

That occupation of farm lands in Canada has increased in the Prairie Provinces during the 1921-31 decade sufficiently to show a net increase for the Dominion in spite of recessions for all eastern provinces, is one of the results emerging from a study of farm census figures as extracted from last year's census returns by federal statisticians.

The bulletin issued on the subject shows that the number of occupied farms in Canada increased during the decade by 17,154 in number or 2.4 per cent. This rate of increase, however, was materially less than that shown in the preceding decade when the numerical increase of 38,701 farms gave a percentage increase of 4.2 per cent.

Each of the western provinces during the 1921-31 decade showed an increase while Ontario, Quebec, New Brunswick, Nova Scotia and Prince Edward Island showed decreases. The percentages of change for each province during the period were: Prince Edward Island, 6 per cent. lower; Nova Scotia, 18.6 per cent. lower; New Brunswick, 7.4 per cent. lower; Quebec was lower by only 1.1 per cent., 36 of its counties showing increases ranging as high as 26.8 per cent.; Ontario was lower by 3.2 per cent. Of the western group Saskatchewan was up by 14.3 per cent.; Alberta gained 17.7 per cent., and British Columbia was up 18 per cent.

Detailed analysis of the Province of Ontario reveals that of its 55 counties, 14 show increases with a maximum increase of 808.7 per cent. in Cochrane County and a minimum of 5 per cent. in Perth County. The remaining 41 counties show decreases ranging from 35.2 per cent. in Temiskaming down to 2 per cent. in Peel, the net decrease for the province being 6,748 farms or 3.2 per cent.

It is explained in presenting the figures that a farm, for the census purpose, was every tract of land of one acre or more that in 1930 produced goods upwards of \$50 in value or which was under crop or used for pasture in 1931. Vacant or abandoned farms were only those which had been cropped and later left unoccupied. The number of these in Ontario was shown at 4,574 against the total for the Dominion of 32,767 farms. Nova Scotia had 3,075, New Brunswick, 1,623, Quebec, 2,746, Manitoba, 6,444, Saskatchewan, 5,193, Alberta, 6,564 and British Columbia, 2,162.

"Do you believe kissing is unhealthy?"

Nell: "I've never—"

Bill: "Never been kissed?"

Nell: "No, never been sick."

# British Scientists To Head Expedition To Northern Canada To Study Aurora Of Arctic

## Has Its Bright Side

Economic Situation In Canada Is Not So Gloomy

It is very easy to look upon the gloomy side of the economic picture even where Canada is concerned, and most of us are prone to spend much time in lamenting our slow progress and the high rate of taxation. It affords some satisfaction upon occasion to take a peek at the other side of the picture and absorb some facts such as the following:

1. In 1931, Canada, in the matter of export trade, moved into fifth position among the nations of the world, and is exceeded in the field of exports by only Great Britain, the United States, France and Germany.

2. Canadian gold production in 1931 was valued at \$55,457,000, setting up a new high record, and exceeding the 1930 production by a little over 27 per cent.

3. The Dominion Bureau of Statistics estimated that Canada's national wealth is now in the neighborhood of \$30,840,000,000, with British and foreign investments in the country representing only slightly more than 20 per cent. of this amount.

## Canada's Sugar Maples

Grow In Area From Maritimes To Lake Of the Woods

According to the Forest Service, Department of the Interior, the natural range of the sugar maple in Canada extends from the Maritime Provinces to the Lake of the Woods in Ontario. In the forest it may reach a height of over 100 feet, but ordinarily does not average more than 75 to 80 feet in height and 2 to 3 feet in diameter. It occurs either in pure stands or is found associated with other hardwoods. It is very tolerant of shade, and this ability enables it to reproduce and survive in competition with other species.

## Mount Revelstoke Park

On a boulder-strewn slope at the top of mount Revelstoke in Mount Revelstoke National Park, British Columbia, is found the Ice Box, a cleft in the rock forty feet long, four feet wide, and about ten feet deep. Filled with snow and ice, it is naturally protected from the sun by its rocky walls, and never lacks its frigid contents. Painted signs direct tourists to this natural phenomenon.

Announcement is made that J. M. Stagg, noted meteorologist, will lead a British expedition of six men to Fort Rae, N.W.T., Canada, to take part in researches connected with the second international polar year to be conducted by field parties of 13 nations under the auspices of the International Meteorological Commission.

Mr. Stagg's expedition will be one of two which Great Britain will contribute to the personnel of the commission's enterprise, which falls on the jubilee of the first international polar year, 1882-83.

The party plans to leave England about May 15 and will travel via Montreal, Edmonton, the Athabasca and Slave rivers to Great Bear Lake on the north arm of which Fort Rae is situated. The other expedition will go to Tromsø, Norway.

Both British parties will be located on the perimeter of the maximum frequency of the Aurora Borealis (northern lights) which they will study by means of synchronized cameras, hoping to accumulate data which will be of use to radio research workers. The expedition at Fort Rae will investigate a theory that the Aurora is caused by rays from the sun stopped by the so-called "Heavy-side Layer" which reflects radio waves and which is thought to extend over the earth at a height of about 60 miles.

The party will set up two camps with equipment about 25 miles apart and linked by telephone. From these two points it will take simultaneous photographs of the Aurora. The expedition will carry 25 miles of telephone wire which will be stretched along the ground in a single strand, and will effect completion of the circuit through the water of the lake in order to avoid carrying an extra length of wire.

The expedition will also study air currents and temperature of the atmosphere at different altitudes. It will send up small balloons carrying instruments for recording altitude and temperature and small wireless sets newly developed in Europe which will automatically signal a continuous record to stations on the ground below.

## Predicts Demand For Heavy Draft Horses

Farmers May Find Them Cheaper Than Tractor Or Combine

The present low price of oats and other feeds, in contrast with the higher costs of gas and oil required in tractor operation, combine, as the Dominion animal husbandman suggests, to indicate that the horse is gradually regaining favor as a medium of farm power. He predicts that the next few years will see a revival in horse breeding and the use of heavy draft horses on the farms in Canada, both east and west. As he points out, under present conditions horses can be bred and reared cheaply and when they have reached working age, the charges for depreciation, fuel and repairs are surprisingly low, for the self-oiling engine has nothing whatever on the self-repairing heavy draft horses.

A Nashville paper defines a citizen thus: "A citizen is a man who demands better roads, bigger schools, a new postoffice and lower taxes." Canada is familiar with the type.

"But, my dear fellow, how much petrol are you putting in that car? That is the ninth tin you have used."  
"Yes. I have heard that my wife intends to elope in this car."—Buen Humor, Madrid.

## CANADIAN MINING EXPERTS DISCUSS MINERAL POSITION OF BRITISH EMPIRE

The Canadian Institute of Mining and Metallurgy held its Thirty-third Annual Meeting at Montreal, April 5, 6 and 7, when the important question of the Mineral Position of the British Empire was discussed by Dr. Charles Camsell (lower right), Deputy Minister of Mines in Canada. In addition five Canadian geologists read papers which illustrated the problems and potentialities of the Canadian Mining Industry. His Excellency the Governor-General (centre), Patron of the Institute, was the Guest of Honor at the Banquet on April 7. Top left is Mr. F. W. Gray, Sydney, N.S., retiring President of the Institute, who played an important part in the proceedings, while top, right, is John A. Allan, Edmonton, Alberta, Professor of Geology at the University of Alberta, who is the President-elect. Lower left is Hon. W. A. Gordon, Canadian Minister of Labour and Mines, who was among the distinguished guests present.

## CHILD need REGULATING?

CASTORIA WILL DO IT!

When your child needs regulating, remember this: the organs of babies and children are delicate. Little bowels must be gently urged—never forced. That's why Castoria is used by so many doctors and mothers. It is especially made for children's ailments; contains no harsh, harmful drugs, no narcotics. You can safely give it to young infants for colic pains. Yet it is an equally effective regulator for older children. The next time your child has a little cold or fever, or a digestive upset, give him the help of Castoria, the children's own remedy. Genuine Castoria always has the name:

*Wm. D. Fletcher*  
**CASTORIA**  
CHILDREN CRY FOR IT

## WORLD HAPPENINGS BRIEFLY TOLD

Commercial telephone service has been established between France and Buenos Aires.

The Prince of Wales attended a dinner given by the Pilgrim Society to Andrew W. Mellon, new United States ambassador to Great Britain.

Italy has signed a treaty with Russia which binds the Soviet to buy \$12,000,000 of Italian products during the year.

A new "lingering" anesthetic which continues to kill pain after an operation, but has no habit-forming power was reported to the American Chemical Society.

The will of John Philip Sousa, famous bandmaster, was filed, leaving his entire estate to his wife and three children. The estate was valued in the will at "more than \$20,000."

Mahatma Gandhi's adopted daughter, Bai Laxmi, 18, an "untouchable," was sentenced to two months imprisonment at hard labor for activities in the civil disobedience campaign.

Howard Nicholson, professional attached to the Granite Club of Toronto, won the open professional figure skating championship of Great Britain at Oxford.

Taking of a plebiscite on abolition of beer parlors will be recommended by the Alberta government next year, providing general conditions improve, Premier Brownlee says.

Great Britain's unemployed on March 21 totalled 2,567,332, which was 113,841 less than the month before and 12,786 less than at the same time last year. The improvement was noticeable in nearly all industries.

As a vermifuge an effective preparation is Mother Graves' Worm Exterminator, and it can be given to the most delicate child without fear of injury to the constitution.

Robert Bruce, Scottish king, was a leper.

## Upset Stomach

"I used BABY'S OWN TABLETS for my children when they had vomiting spells, and found that they settled the stomach," writes Mrs. J. M. Guthrie, Smith's Falls, Ont. Valuable for teething troubles, colds, fevers, colic. Easy to take—and harmless. See certificate in each 25c package. 238

**BABY'S OWN TABLETS**

LADIES WANTED TO DO LIGHT sewing at home. Good pay. Work sent, charges paid. Stamp for particulars. National Manufacturing Company, Montreal.

## Preserve Virginia Timberland

Frank J. Barnjum Acquires Large Tract On Vancouver Island

Another large tract of virgin timberland on Vancouver Island will be preserved for posterity through the generosity of Frank J. Barnjum, Montreal philanthropist and tree conservationist. Two thousand acres of timbered land on the Cowichan River has been acquired by Mr. Barnjum from its owners. The property is a beautiful park area replete with rivers, streams and lakes, with wild life in the woods and fish in the streams. The purchase makes Mr. Barnjum the largest holder of big timber on that river.

## Makes Canoe Safer

New Type Of Non-Capsizing and Unsinkable Craft Is Constructed

A new type of non-capsizing and unsinkable canoe, weighing between 80 and 90 pounds and for which a patent has been secured, has just been built by M. Pepin, of Quebec City. He claims that even with a full load there is not the slightest danger of the craft sinking nor can it turn over. With an outboard motor, Pepin says, the canoe will be capable of making 35 miles an hour.

## Winnipeg Newspaper Union

PARIS IS HAVING HER SAY ABOUT THE JACKET DRESS THIS SEASON

Whether you want a sheer woollen dress or a crepe silk dress for spring wear—here is a charming model.

It is jacketed in a most approved and voguish way. And it's exceptionally slimming with its bias lines. The sleeveless dress offers such marvellous schemes for contrast.

Since blue is so modish, imagine the effectiveness of this model in a blue crepe silk delicately patterned in yellow. For the upper bodice, plain yellow crepe is used.

Could anything be more charming and practical?

Style No. 334 is designed for sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. Size 36 requires 3½ yards 39-inch with ¾ yard 39-inch contrasting.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

## Turret Cigarette Hockey Contest Headquarters Staff Sorting the Millions of Entries Received

The scene illustrated above will give our readers a slight idea of the vast number of entries received in the Turret Cigarette \$15,000.00 Cash Prize Hockey Contest. Well over three million entries were sent in,

bearing the post mark of March 5th, or a prior date, which was a condition binding upon all contestants desiring to qualify for one of the 289 cash prizes. The enormous task of judging these millions of entries is

going forward as rapidly as possible. According to the latest reports from Contest Headquarters, it will be possible to publish the complete list of prize winners about the latter part of April.

## Recipes For This Week

(By Betty Barclay)

### JELLIED RHUBARB PIE

1 package quick-setting gelatin dessert (lemon flavor).  
1 cup boiling water.  
¼ cup orange juice.  
2 lbs. young strawberry rhubarb  
1½ cups granulated sugar.  
Cut rhubarb in one-inch pieces. Steam in double boiler until tender, but unbroken. Add sugar when nearly done. Dissolve quick-setting gelatin dessert in boiling water. Measure any juice from rhubarb and add water, if necessary, to make ¼ cup. Add to gelatin. Add orange juice. Chill until it begins to thicken and then fold in carefully, the pieces of rhubarb. Pour into small baked pastry shells and chill until firm. Garnish tops with meringue of a rosette of softened cream cheese.

### OATMEAL MACAROONS

2½ cups of rolled oats (oatmeal).  
1 cup of sugar.  
1 teaspoon of vanilla.  
2 eggs.  
1 tablespoon of melted butter.  
2 teaspoons (rounded) baking powder.  
1 level teaspoon of salt.  
cup seedless raisins.  
Cream sugar and melted butter—add beaten yolks, then work in gradually oatmeal, to which has been added salt and baking powder. Then add vanilla and nutmeg and beaten whites of eggs and raisins. Drop in small quantities on floured baking pan and bake in rather slow oven.

## Reduce Freight Costs

Plan Construction Of Road In Great Bear Lake District

Construction of a road around the seven miles of rapids in the Bear River is under consideration by the Dominion public works department as a step to reduce freight costs and simplify transportation into the miner district of Great Bear Lake.

C. C. Ross, of the Dominion Mining and Metallurgy Department, revealed this move in an address at Calgary. Transportation, he said, was the great problem facing development of the radium-bearing pitchblende discoveries around Great Bear Lake.

## SUNDAY SCHOOL LESSON

APRIL 17

### THE CALL OF ABRAHAM

Golden Text: "Be thou a blessing." Genesis 12:2.  
Lesson: Genesis 12:1-9.  
Devotional Reading: 11:8-10, 17-19.

**Explanations and Comments**  
The Call and the Promise, verses 1-3.—Whether Abraham received two calls or only one call to leave his home is a much disputed question. It seems natural to suppose that the call came to both Abraham and his father at Ur (see Acts 7:2-4; Genesis 11:31) and was reaffirmed by Abraham at Haran. When they reached Haran, Terah and Abraham settled there for a time, and there Terah died.

The name "Abraham" (the father of a multitude, Genesis 17:5) is based, according to Professor Kent, on a similarity of sound to the Hebrew word "Hamon," meaning multitude. He deems the two forms, Abram and Abraham, as but dialectic variations of the familiar Hebrew name Abiram, meaning the father is exalted (or the lofty on his father). The name has been found on a Babylonian tablet from the reign of Hammurabi's grandfather, hence used as an individual name at least as early as 2000 B.C.

Get thee out of thy country, and from thy kindred, and from thy father's house. These are cumulative expressions which show the greatness of the demand; Abraham must count the cost, for he had much to lose. He must leave behind him all that was familiar and dear. His kindred worshipped a multitude of deities (Genesis 31:30), and his faith in the one true God took him away from such associations. The goal, "the land that I will show thee," is definitely stated in verse 7. The promised reward, "I will make of thee a great nation," is a thought which runs through the whole book of Genesis. In him all the families of the earth should be blessed. Through the call of Abraham, the choosing of Israel, the history of the nation, the birth of Christ—through it all God was working to the one end, the blessing of all peoples, the redemption of the world.

There are two sides to the wonderful message of God to Abraham: on the one hand he is promised that he shall be blessed, and the particular ways in which he shall be blessed are stated—he will become a great nation, his name will be great, those that bless him will be blessed, and those that curse him will be cursed; on the other hand, he is admonished to be himself a blessing.

**The Call Obeyed**, verses 4-6.—With Sarai his wife and Lot his nephew and with all their flocks and herds, slaves and dependents, Abraham, at the age of seventy-five, left Haran for the land of Canaan.

"Abraham went out, not knowing whither he went." Does that command ever come to us—not to leave our country, but to leave the surroundings in which we find ourselves; to get out of the business, out of the social circle, out of the environment in which we cannot serve God—whatever the cost.—A. C. Dixon.

"The great trek is dismissed in a sentence": "They went forth to go into the land of Canaan; and into the land of Canaan they came." Nothing is said of the length of the journey, the dangers on the way, the hardships endured; but the essential fact is stated, Abraham had faith in the divine prompting, and acted on his faith.

## Trans-American Airlines

Developing Air Route Across the North Atlantic

Pan-American Airways announced it had entered into an agreement with Trans-American Airlines to conduct the necessary survey and research work for development of an air route across the north Atlantic.

Details of the transactions were not made public and it was not definitely known whether survey flights would be made next summer over the proposed course, which is by way of Canada, Greenland, Iceland and the Faroe and Shetland Islands.

It was announced, however, that the thorough study of the project being undertaken will be a preliminary step to the actual launching of exploratory flights through the north.

Trans-American Airlines has been assisted during the past year in its study of the problem by the noted polar explorer, Vilhjalmur Stefansson, who proposed a northern commercial air route 13 years ago.

As an indication of the progress made in the preliminary work, it was pointed out the parliament of Iceland within the last month has passed an act granting Trans-American and their associated interests a 75-year franchise for the transportation of mail over Iceland on an air route between North America and Europe.

The specific routing of the northern line has not been determined pending the further extension of surveys.

## Australia Is Very Old

Geological Formations Estimated To Be 20,000,000 Years Old

A discovery made by gold prospectors recently affords further proof of Australia's great age. After boring through 200 feet of basalt they struck an old river-bed, and brought up water-polished stones which, according to the experts, had not been exposed to sunlight for over a million years. And there are geological formations in the Island Continent which are estimated to be at least 20,000,000 years old. Australia, too, has preserved living links with its remote past. Some of its animals and plants are definitely prehistoric species, such as have survived nowhere else. The duck-billed platypus, for instance, is the oldest existing type of mammal.

## CHAPTER XVII.—Continued.

"Yes," she acknowledged. "I am afraid I have been blind, Geoffrey. Indeed—indeed I would have prevented all this if I had known, if I had guessed. But, honestly, I just thought of you—you and Judith—as friends."

"I believe you really did," he said slowly, almost incredulously. Then, as though in swift corollary: "Jean, is there anyone else?"

The question drove at her with its sudden grasp of the truth. Her face grew slowly drawn and pinched-looking beneath his merciless gaze and her lips moved speechlessly.

"So it is that, is it? And does he—has he—"

"Geoffrey, you are insufferable!" The words came wrung from her in quick, low protest. "You have no right—no right—"

"No, I suppose I haven't," he admitted, touched by the stricken look in her eyes. "I'd no business to ask that. For the moment, it's enough that you don't love me. . . . But I shall never give you up, Jean. You're mine—my woman!" The light of possession flared up once more in his eyes. "Do you remember I told you once that, if a man makes up his

DEFINITE HELP FOR  
DWELLERS IN  
APARTMENTS

Odorless way found to cook fish, cauliflower and cabbage

CANAPAR IS A PRODUCT OF HAMILTON FIRM

Lives there a woman, in apartment, duplex or home, who has not at some time or other reluctantly foregone fish, cabbage, and cauliflower because of the odors they give off when being cooked? Or who has not suffered from other people close by who cooked these foods regardless?

Canapar entirely does away with this annoyance. More than that, it actually improves flavor and food value. Cooking in Canapar parallels the famous French method of simmering and confining food and its flavours to the closed casserole.

Canapar comes in large sheets, in a handy-size package. When boiling vegetables you simply wet the sheet of Canapar and make a bag similar to a pudding bag. If you are steaming them you line your steamer with Canapar, arrange food and seasoning, and fold back corners of the Canapar to prevent steam from dripping back.

Boiled or steamed fish is particularly delicious done this way. No fishy odor in the kitchen, no gummy kettle to clean. When roasting meat, line the pan with Canapar. It prevents the fats and juices from burning, and eliminates scouring of the pan afterwards.

Canapar saves fuel. You can cook three vegetables simultaneously in the same saucepan with it, without intermingling of flavors. And it is very economical. Just rinse the sheet after using it, hang it on the towel rack to dry. Use it over and over again.

Lots of women use Canapar for a dish cloth—it is so silky and satisfactory and does not spread lint. This is a particularly good use if you happen to pierce the sheet of Canapar while testing the food during the cooking of it. Canapar is made by the makers of PARA-SANI the famous heavy waxed paper in the Green box.

## Special Offer

Most grocers, druggists and department stores sell Canapar. If yours doesn't, send the coupon direct and we'll give you a new and unique book entitled "Leftovers" containing one hundred recipes as a bonus for your trouble.

Appleford Paper Products, Ltd.,  
Hamilton, Ontario.

Enclosed find 25c for which please send me one full-size package of CANAPAR Cookery Parchment and your 100 recipes for "Left-overs."

## Utterly Worn-Out

Mrs. Fitzpatrick Tells How Dr. Williams' Pink Pills Made Her Well.

Can Now  
Run  
Upstairs.

"I became run-down and unable to do my work for a family of seven," writes Mrs. W. P. Fitzpatrick, Marquis, Sask. "I was told I had anaemia, and I took treatment, but with very little improvement. Finally my sister, who had had the same disease, advised me to try Dr. Williams' Pink Pills, as they had done her so much good. I have taken seven boxes. Today I'm well; able to do my own work; no more tired feeling or weak spells. I can run upstairs without puffing. I sleep and eat well. My friends are astonished at my changed appearance and never fail to ask what I'm taking. My reply is: 'Dr. Williams' Pink Pills.'"

Dr. Williams' Pink Pills actually create an abundance of new red blood, which is the reason why they have given new vitality and strength to thousands of such nervously exhausted and overtired women. Equally helpful for growing girls. Try them. At your druggist's in the new glass container. 50c a package. 272

mind, he can get his own way over most things? Well, it's true."

He paused a moment, then abruptly swung round on his heel and, without a word of farewell, strode away across the garden towards the gate by which he had entered.

As the latch clicked into its place behind him, Jean was conscious of a sudden tremor, of a curious, uncontrollable fear, as though his words held something of prophecy. The man's dominating personality seemed to swamp her, overwhelming her by its sheer physical force.

The remembrance of her sinister dream, and of the dream-Burke's threat: "It's too late to try and run away. If you don't come into my parlour, you'll be stamped with the mark of the beast forever," returned to her with a disagreeable sense of menace. She shivered a little and, picking up her basket, almost ran back to the house, as though seeking safety.

## CHAPTER XVIII.

## Cross-Purposes

In the task of arranging her roses in the various bowls and vases Baines had set in readiness for her, Jean found a certain relief from the feeling of terror which had invaded her. Something in the homely everydayness of the occupation served to relax the tension of her mind, keyed up and overwrought by the stress of her interview with Burke, and it was with almost her usual composure of manner that she greeted Blaise when presently he joined her.

"I've raided the rose-garden today," she said, smilingly indicating the mass of scented blossom that lay heaped up on the table. "I expect when John finds out he will proceed to meditate upon something for my benefit with boiling oil in it."

Johns was one of the gardeners to whom Jean's joyous and wholesale robbery of his first-fruits was a daily cross and affliction. Only chloroform would ever have reconciled him to the cutting off of a solitary bloom while still in its prime.

Blaise regarded the tangle of roses considerably.

"I wonder you found time to gather so many. When I passed by the rose-garden, you were—otherwise occupied."

The quietly uttered comment sent the blood rushing up into Jean's face. When had he passed? What had he seen?

She kept her eyes lowered, seemingly intent upon the disposition of some exquisite La France roses in a black Wedgwood bowl.

"What do you mean?" she asked negligently.

Tormarin was silent a moment. Had she looked at him she would have surprised a restless pain in the keen eyes he bent over her.

"Jean—he spoke very gently—have I to congratulate you?"

It was difficult to preserve her poise of indifference when the man she loved put this question to her, but she contrived it somehow. Women become adepts in the art of hiding their feelings. The conventions demand it of them.

Jean's answer fluttered out with the airy lightness of a butterfly in the sunshine.

"I am sure I can't say, unless you tell me upon what grounds?"

"You know of none, then?"—swiftly.

"None."

She nibbled the end of a stalk and

surveyed the Wedgwood bowl critically. Tormarin felt like shaking her.

"Then," he said gruffly, "let me suggest you revise your methods. The woman who plays with Geoffrey Burke might as safely play with an unexploded bomb."

His voice betrayed him, revealing the personal element behind the proffered counsel.

Jean glanced at him between her lashes. So that was it! He was jealous—jealous of Burke! At last something had happened to pierce the joints of his armour of assumed indifference! Her heart sang a little paean of thanksgiving, and all that was woman in her rose bubbling to meet the situation. In an instant she had recaptured her aplomb.

"I think I rather enjoy playing with unexploded bombs," she returned meditatively. "There are always possibilities—about them."

"There are"—grimly. "And it is precisely against those possibilities that I am warning you."

"Don't you think it's rather bad taste on your part to warn me against a man who is admittedly on terms of friendship with you all?"

"No, I don't"—steadily. "Nor should I care if it were. When it's a matter of you and your safety, the question of taste doesn't enter into the thing at all."

"My safety?" jeered Jean softly. (It was barely half an hour since Burke had inspired her with that sudden fear of him and of his compelling personality!)

"Well, if not your safety, at least your happiness," amended Burke.

"It's very kind of you to interest yourself, but really my happiness has nothing whatever to do with Geoffrey Burke."

"Is that true?"

He flashed the question at her, and there was that in his tone which set her pulses athrill, quenching the light-hearted spirit of banter that had led her to torment him. It was the note of restrained passion which she had heard before in his voice, and which had always power to move her to the depths of her being.

"Perfectly true," she faltered a little. "But"—forcing herself to a defiance that was in reality a species of self-defence—"I fail to see that it concerns you, Blaise."

"It concerns me in so far as Burke is not the sort of man that a woman can make a friend of. It's all or nothing with him. And if you don't intend to give him all, you'd better give him—nothing."

His glance, grave and steady, met hers, and she knew then, of a certainty, that he had witnessed the scene which had taken place in the rose-garden, when Burke had held her in his arms and the flood of his passion had risen and overwhelmed her. He had witnessed that—and had misunderstood it.

She was conscious of a fierce resentment against him. It mattered

When  
PAIN  
Comes

WHAT many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali, which neutralizes the acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia.

One spoonful of this harmless, tasteless alkali in water neutralizes instantly many times that much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go, get a small bottle to try.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. 50c a bottle—any drug store. (Made in Canada.)

W. N. U. 1937

Bank Robbery---  
Four Murders---  
Doctor Killed

The wounded bandit in custody

His mark caught him

## Bandit Left His Mark

On May 28, 1928, four bandits robbed a bank in Lamar, Colorado. They killed two officers. Then, in escaping with a wounded bandit, they killed the doctor who treated the wound. This atrocious crime aroused two states to action.

The leader of the gang left his finger print on the glass of the doctor's car.

Police records proved that this mark belonged to a robber who called himself, among other names, Jake Fleagle. Thus the whole gang was identified, and three were hanged.

Fleagle himself, after a chase of two years, was wounded in resisting arrest and later died. All because a finger touch left its print on a piece of glass.

## So You Leave Marks

This is told to indicate how you leave imprints on everything you touch. Those imprints are germ-laden. You leave them on the toast you butter, on a piece of cake, on a stick of gum.

The germs in those imprints may have been picked up by touching things which others touched with contaminated hands. Life Extension Institute lists 27 diseases which may be conveyed in this way. A cold, for instance, may be passed to many people—by a handshake.

When you carry such germs to your food—by a touch—they breed and multiply. That is something to think about.

## Safety and Luxury

Germs, of course, are everywhere, but we can lessen their danger by using Lifebuoy.

Here you have a luxurious toilet and bath soap, based on two palm oils. No soap ever created does more for the skin and complexion. But it also contains an antiseptic.

Do not touch food, or anything which enters the mouth, until your hands are washed with Lifebuoy. Partial germ removal is not sufficient. You must either remove or make inactive the germs that threaten your health. Lifebuoy will do this.

## Stops Body Odour

Lifebuoy gives you luxurious, creamy lather. You never used a more delightful soap. But the odour is not a perfume. It's a refreshing scent that spells safety. It disappears in a few minutes, but it tells you that the germs have been washed away from your hands.

Lifebuoy's lather goes deep into the pores of your skin, cleansing them of odour-causing waste. After using Lifebuoy in a bath, your whole body is exempt from offensive body odour for hours. Is not such protection worth more than perfume to you?

Many millions of people, the world over, think so. Your dealer has Lifebuoy for you. Try it today.

Lever Brothers Limited, Toronto

nothing to her that, in the light of her nonchalant answers to his questions, he was fully justified in the obvious conclusion he had drawn. She did not stop to think whether her anger was reasonable or unreasonable. She was simply furious with him for suspecting her of flirting—odious word!—with Geoffrey Burke. Well, if he chose to think thus of her, let him do so! She would not trouble to explain—to exculpate herself.

She regarded him with stormy eyes.

"Please understand, Blaise, that I want neither your advice nor your criticism. If I choose to make a friend of Geoffrey Burke or of any other man—I shall do so without asking your permission or approval. What I do, or don't do, is no business of yours."

(To Be Continued.)

Miller's Worm Powders destroy worms without any inconvenience to the child, and so effectually that they pass from the body unperceived. They thoroughly cleanse the stomach and bowels and leave them in a condition not favorable to worms, and there will be no revival of the pests.

Shipping Clerk (reading report of cabinet minister's speech)—I hope this is true. He says that the battle against depression is won.

Colleague—Let's show that to the boss and perhaps he will cease firing.

It is predicted that electronic tubes which serve as miniature red and green traffic lights will be installed on the dash board of automobiles of the future.

An all-glass house that is asserted to exclude air, dirt, and bacteria, has been built by a scientist in Japan, ventilation being provided by air pumped from a distant point through filters.

Mrs. McFarlane is a Calgary visitor this week.

Mr. and Mrs. J.H. Oliphant motored to Calgary on Thursday last.

The Court of Revision of the Village of Carbon was held at the office of the secretary-treasurer on Tuesday of this week. Quite a number of claims were registered. Some may be considered.

Ralph Kaehn has been drilling on the old well near the fire hall for the Village. The well is down almost 150 feet, although we have not had the latest reports on water results.

**Hesketh News**

A Dance will be held in the Hesketh Community hall on Friday, April 15th. Mrs. T.J. Ramsay and Jean spent the week-end visiting at the home of Mr. and Mrs. Ross Thorburn at Hesketh.

Mrs. Poile and son Gladwin, left last week for High River, and will spend the summer there. They have a farm in the High River district.

**Southern News**

Mr. and Mrs. Otto Gittel and Miss Katie Kary were visiting with the F. Gittel family, parents of Otto Gittel, at Crossfield, over the week end.

Mr. C.J. Bertsch and J. S. Bertsch made a trip to Turner Valley on Monday of this week to get a load of oats.

Mr. G. E. Schell and Otto Gittel went to Calgary with a load of oats on Wednesday and brought back a load of gasoline.

Reports of the first seeding of the season were received on Thursday of last week when Chris. Bertsch Jr. was out with the drill. Seeding is not expected to be general until next week. Don't forget to get your counter check books at The Carbon Chronicle.

**WANT ADS. GET RESULTS****FREIGHT TRUCK LICENSE FEES  
PROVINCE OF ALBERTA****CLASSIFICATION OF TRUCKS**

All freight vehicles and trucks, in addition to paying the fees set out below, must also pay the usual motor vehicle license as formerly, according to wheel base measurement.

**CLASS A.**—Includes all trucks used as public carriers for freight haulage. Fees printed below.**CLASS B.**—Includes all freight vehicles other than those in the other classes. Fees printed below.**CLASS C.**—Includes trucks operating within cities, towns and villages. These are permitted to operate outside to the extent of five miles beyond the corporate boundaries of the cities, towns or villages in which they are licensed. No fee in this class other than usual motor license.**CLASS D.**—Includes trucks owned by farmers, market gardeners, or ranchers, and used for the transporting of their own property. No fee other than usual motor license.**CLASS E.**—Includes trucks in classes "C" and "D" used for hauling grain between August 1st and December 31st in one year. Fees in this class one-quarter of those in Class "B".**FEES FOR CLASSES "A" and "B"**

Fees for Classes "A" and "B" are figured on gross weight, which shall mean the combined weight of the chassis, body and cab of the freight vehicle and the manufacturer's rated carrying capacity.

Fees in these classes range from 50 cents per 100 lbs. to \$1.75 per 100 lbs. according to their weight classification.

Applications for truck licenses, stating weight and carrying capacity of truck, should be made to

E. TROWBRIDGE,  
Deputy Provincial Secretary,  
Edmonton, Alberta.
